

J. RANCK
ELECTRIC, INC.

SKILLED TRADES SCHOLARSHIP

J. Ranck Electric, Inc. (JRE) has become the company it is today through the hard work of many skilled tradespeople from electricians to laborers and operators. Michigan is facing a shortage of skilled tradespeople. As a result of this, our office and field team have been making a concerted effort to reach as many people as possible to show them how rewarding and successful careers in the trades can be. To further aid this effort, we are offering five \$500 scholarships to those entering a construction-based skilled trades education/training program. Preference will be given to those entering the electrical field and relatives of JRE employees.

Scholarship awards will be available for qualified education expenses (training program fees, tuition, books, and tools) and paid directly to the student.

Applications must be received by October 25, 2024

The application for this scholarship must be completed online at www.jranck.com/scholarship

Selection Criteria:

Essay answer (50 points)

Letter of recommendation (30 points)

Electrical field interest (10 points)

JRE employee relation (5 points)

Experience in trade field (5 points)
